

Skills

Programming Languages:

- C/C++
- Java
- JavaScript
- Python
- MATLAB
- PHP

Frameworks:

- React.js
- Node.js
- 5G ToolBox

Data Management:

- SQL
- MongoDB

Web and Data Formats:

- HTML
- CSS
- XML
- JSON

Operating Systems:

- Windows
- Linux

Networking:

- Network protocols (ISO/OSI, TCP/IP)
- Network configuration
- Cisco Packet Tracer
- Wireshark (basics)

Productivity Tools:

- Technical writing
- LaTeX
- Microsoft Office suite

Soft Skill:

- Problem Solving
- Teamwork
- Flexibility
- Open-mindedness

Language Skills

- **Italian**: Native
- **English**: B2

About me

Bachelor's degree graduate in Computer and Automation Engineering, currently enrolled in the Master's Degree in Telecommunications and Internet Technologies Engineering (Cyber Security curriculum), with experience in developing original projects. Highly motivated to pursue a career in IT and Cyber Security.

Education & Training

Master's Degree in Telecommunications and Internet Technologies Engineering (Cyber Security curriculum)
21/09/2026 - Current| Polytechnic of Bari | Level in EQF: 7

Bachelor's Degree in Computer and Automation
01/09/2021 - 22/07/2026 | Polytechnic of Bari | Final grade: 88 | Level in EQF: 6
Thesis: Performance Analysis of Non-Terrestrial Network Architectures Using System-Level Communication Models

Industrial Technical Diploma in Computer Science and Telecommunications
01/09/2016 - 19/06/2021 | I.I.S.S Ettore Majorana, Martina Franca (TA) | Final Grade: 100 | Level in EQF: 4

Certifications

Pre Security Learning Path
Try Hack Me | 03/08/2026

Matlab Onramp
MathWorks | 18/11/2022

Introduction to Cyber Security
Cisco Networking Academy | 29/03/2021

Progetti

Chess Trainer
Fully client-side web app for chess training: every move is evaluated by Stockfish 18 Lite running in a Web Worker and classified in real time. Built with vanilla JavaScript, HTML and CSS, it uses chess.js for rule handling and includes an opening recognition system. Works offline thanks to a service worker and PWA configuration, with no backend or user accounts.
02/08/2026 - 04/09/2026 | https://wdaav.github.io/projects/chesstrainer/

Link-To-System LEO
Thesis work on link-level simulations between LEO satellites and terrestrial UEs, using Link-to-System (L2S) abstraction in MATLAB 5G Toolbox and compliant with 3GPP specifications (TR 38.821 and TR 36.763). Modeled link budget and 5G NR physical layer (LDPC, HARQ, TDL-D channel) across four eMBB and IoT scenarios, with link adaptation (MCS selection) to evaluate throughput versus elevation angle.
01/05/2026 - 22/07/2026 | https://wdaav.github.io/projects/l2sleo/

Movie Matcher
Single Page Application for desktop and mobile devices for collecting movies and playing together: users choose what to watch in real-time multiplayer rooms by voting on movies with likes/dislikes. Authentication with Auth0 and integration with the TMDB API for movie data. Built with JavaScript (frontend: React, backend: Node/Express with REST APIs and Socket.io), MongoDB for data management, deployed on Render.
01/08/2024 - 01/10/2024 | https://wdaav.github.io/projects/moviematcher/

See Beyond
Progressive Web App (PWA) for mobile devices providing real-time assistance for visually impaired users. An Object Detection model (PyTorch, Faster R-CNN) recognizes objects and estimates their distance via triangulation, while OCR, a voice assistant and Google Maps navigation deliver audio feedback to the user. Built with JavaScript (React, frontend) and
Python (backend), with Firebase for hosting and data management.
15/11/2023 - 30/12/2024 | https://wdaav.github.io/projects/seebeyond/

Smart Medical Exam
Desktop and mobile applications for automating the digitization and sharing of medical reports. The desktop software uses OCR (Tesseract) to convert scanned reports into .csv files, which are uploaded to a Linux server via SCP/SSH and made available to patients through the Android app. Built with Python (desktop application, Tkinter GUI) and App Inventor (mobile application), with a relational database (MySQL) for data management.
21/04/2021 - 29/05/2021 | https://wdaav.github.io/projects/sme/

In progress/scheduled certifications

Cyber Security 101, Try Hack Me | In progress

Security Analyst Path, Try Hack Me | Scheduled
SOC Level 1, SOC Level 2, Advanced Endpoint Investigations, Defending Azure, Windows Incident Response & Forensics.

Penetration Tester Path, Try Hack Me | Scheduled
Jr Penetration Tester, Web Application Pentesting, Web Application Red Teaming, Red Teaming).

Security Engineer Path, Try Hack Me | Scheduled
Security Engineer, DevSecOps, Defending AWS.

AI Security, Try Hack Me | Scheduled
